

FOOD PLOTS

Green Up on existing plots or New Seedings:

Apply 2 to 4 quarts of Forage Factor, 2 quarts of Earthquake or Earthquake Plus and 8 ounces of BOLT, per acre.

Bi-weekly Follow Up Applications:

Apply 1 to 2 quarts of Forage Factor, 1 quart of Earthquake or Earthquake Plus and 4 ounces of BOLT, per acre.

Monthly Follow Up Applications:

Apply 2 to 4 quarts of Forage Factor, 1 quart of Earthquake or Earthquake Plus and 8 ounces of BOLT, per acre.

Cal-zone

should be applied (by itself) at a rate of 3 to 5 gallons per acre in both spring and fall.

The above suggested applications are based on first hand experiences that have shown success with these products and rates. Based on growing conditions, products and application rates may vary.

When applying Sugar Creek Ag products with other products, including herbicides, pesticides and fungicides; a jar test is recommended for compatibility.
