

CUCERBITS / COMMERCIAL PRODUCE

Pre-Plant: Apply 3 to 5 gallons of Cal-zone, rate determined by percent of base saturation. (see Cal-zone label) Other products that can be applied pre-plant and should be considered include: OVERHAUL, REVAMP, N2-GROW, Earthquake Liquid Humic and Earthquake Plus

At Planting (or in transplant water): add 2 quarts of Earthquake Liquid Humic or Earthquake Plus and 1 quart of Micro-N-Rich to your starter. Phos Factor Z can be used as a starter. (2 to 3 gallons per acre)

Many of our customers are also adding one or two of the following products to their starter:

* 1 quart/Liquid Kelp * 5 ounces of REVAMP * 6 ounces of Nano CS

If “dipping” transplants; use a solution of 1 to 2 ounce of Phos Factor Z, 1 ounce Earthquake Liquid Humic or Earthquake Plus, per gallon of water.

Vegetative Growth Stage: Apply 1 quart Earthquake or Earthquake Plus and 1 quart of Triple 8 Plus, applied weekly or bi-weekly as needed. Can be applied through drip irrigation. 7 to 14 days prior to bloom stage, add 1 pint of BOLT to this application.

Reproductive Growth Stage: Apply 2 quarts of PaybackK and 4 ounces of BOLT, applied weekly or bi-weekly as needed, through harvest. **Consider adding 4 ounces of Nano K or Nano Phos based on crop need.**

COMMENTS:

- When applying Sugar Creek Ag products with other products, including herbicides, pesticides & fungicides; a jar test is recommended for compatibility.

Other products to consider for Cucerbites and Commercial Produce include:

Micro-N-Rich (3-0-0 with 5 micros)
BrimStone 17

Nano Zn

Liquid Kelp
Nano Phos

REVAMP (stimulates microbial activity)
Nano Pro
Nano K

We understand that farming practices will vary from farm to farm, as do growing conditions, crop needs, etc. Feel free to contact us to discuss the best ways to utilize our products on your farm. Our products should be considered a supplemental “tool” to assist you in meeting your goals and to address soil and crop challenges.
