TOBACCO

Setter Water:

Regardless of starter fertilizer used, add 2 quarts of Earthquake Liquid Humic (or Earthquake Plus), 1 quart of Liquid Kelp and 5 ounces of REVAMP. Many of our customers are also adding 1 to 2 quarts of Micro-N-Rich. Phos Factor Z can also be used as a starter at 2 to 3 gallons per acre, finished with water for best coverage.

Lay By:

With liquid nitrogen, add 1 to 2 quarts of Earthquake Liquid Humic (or Earthquake Plus), 1 to 2 quarts of Micro-N-Rich and 4 ounces of Nano N+ per acre.

Foliar Applications prior to Topping:

When spraying Orthene or other chemicals, add 1 to 2 quarts of Triple 8 Plus and 1 quart of Earthquake Liquid Humic. Nano Pro is suggested to be added to every foliar application that includes foliar fertility, fungicides, and systemic insecticides; for enhanced delivery of applied nutrients and chemistry.

If you are applying a basic 6-24-6 type product at this time, it is suggested to add 1 to 2 quarts of Earthquake Liquid Humic (or Earthquake Plus) and 1 to 2 quarts of Micro-N-Rich

Reproductive Growth Stage / Topping: Apply 2 quarts of PaybacK and 1 quart of Kelp per acre for additional leaf size and weight.

COMMENTS:

- REVAMP can be continously applied with follow up applications, after planting, at 5 ounces per acre.
- When applying Sugar Creek Ag products with other products, including herbicides, pesticides & fungicides; a jar test is recommended for compatibility.
- All suggested applications are "Per Acre".

Many of our products focus on efficiency; getting the most from all your inputs! Soil efficiency, Foliar nutrient efficiency and Herbicide, Pesticide and Fungicide efficiency!

We understand that farming practices will vary from farm to farm, as do growing conditions, crop needs, etc. Feel free to contact us to discuss the best ways to utilize our products on your farm. Our products should be considered a supplemental "tool" to assist you in meeting your goals and to address soil and crop challenges.
