MELONS

Pre-Plant: Apply 3 to 5 gallons of Cal-zone per acre, rate determined by base saturation on soil test. (see label)

At Planting: 2 quarts of Earthquake Liquid Humic (or Earthquake Plus), 2 to 3 gallons of Phos Factor Z, 1 quart of Micro-N-Rich, and 5 ounces of REVAMP per acre. Can be applied through drip irrigation.

If "dipping" transplants, use a solution of 1 to 2 ounces of Phos Factor Z, 1 ounce of Earthquake or Earthquake Plus, per gallon of water.

Vegetative Growth Stage: Apply 1 quart of Triple 8 Plus and 1 quart of Earthquake Liquid Humic per acre. This application can be made weekly, bi-weekly or as needed. Can also be applied through drip irrigation. A week or two prior to bloom stage, add 16 ounces of BOLT to this application.

Reproductive Growth Stage: Apply 2 quarts of Payback and 8 ounces of BOLT per acre. This application can be made weekly, bi-weekly or as needed through harvest. Can also be applied through drip irrigation.

COMMENTS:

- When applying Sugar Creek Ag products with other products, including herbicides, pesticides & fungicides; a jar test is recommended for compatibility.
- One quart of Liquid Kelp can be added to any application during the growing season.
- When foliar feeding, it is suggested to add 4 ounces of Nano Pro to every application.
- Consider adding INSECT-X-CITER when applying insecticides.

Other products to consider for Melons include:

Nano K Nano Phos SSS Nano Fe Flex'N (8-0-2-4S with 4 micros) BrimStone 17 Nano Zn OVERHAUL

We understand that farming practices will vary from farm to farm, as do growing conditions, crop needs, etc. Feel free to contact us to discuss the best ways to utilize our products on your farm. Our products should be considered a supplemental "tool" to assist you in meeting your goals and to address soil and crop challenges.
