

MILO/SORGHUM

At Planting: If using a starter, add 2 quarts of Earthquake Liquid Humic and 5 ounces of REVAMP per acre. If not using a starter, REVAMP can be applied at 12.8 ounces per acre with burndown application.

Other products to consider adding to starter application include: Micro-N-Rich, BrimStone 17 and Liquid Kelp. Phos Factor Z can also be utilized as a starter.

Vegetative Growth Stage: Apply 2 quarts of Triple 8 Plus and 1 quart of Earthquake Liquid Humic per acre. We suggest adding 4 ounce of Nano Pro to this application for enhanced nutrient and chemistry delivery. This application can accompany a herbicide application.

Reproductive Growth Stage: Apply 2 quarts of PaybackK per acre. 4 ounces of Nano Pro can be added to this application for enhanced nutrient and chemistry delivery. This application can accompany a fungicide application.

COMMENTS:

- When applying Sugar Creek Ag products with other products, including herbicides, pesticides & fungicides; a jar test is recommended for compatibility.
- When spraying herbicides, use **WILDFIRE** for a more effective weed kill. Saves you time and money!
- If your crops are needing calcium, consider applying Cal-zone. 100% plant available!

Other products to consider for Milo include:

Micro-N-Rich (3-0-0 with 5 micros)
Flex'N (8-0-2-4S with 4 micros)

Liquid Kelp
BrimStone 17

Nano K
Nano Phos

Nano Zn
Dropkick 21

We understand that farming practices will vary from farm to farm, as do growing conditions, crop needs, etc. Feel free to contact us to discuss the best ways to utilize our products on your farm. Our products should be considered a supplemental "tool" to assist you in meeting your goals and to address soil and crop challenges.
