

PEANUTS

Pre-Plant: Apply Cal-zone 3 to 5 gallons per acre; rate determined by base saturation on soil test. (see label)
If not using Cal-zone, consider applying 12.8 ounces of REVAMP per acre with your burndown application.

At Planting: Apply 2 quarts of Earthquake or Earthquake Plus and 5 ounces of REVAMP with a starter.
Consider also adding 1 quart of Liquid Kelp.

Vegetative Growth Stage: Apply 2 quarts of Triple 8 Plus and 1 quart of Earthquake or Earthquake Plus
The above application can be repeated during the vegetative growth stage, as needed.
Consider adding 4 ounces of Nano Phos to this application.

This application can accompany other products being applied at this time.

Reproductive Growth Stage: Apply 2 quarts of Payback and 16 ounces of BOLT, per acre.
Micro-N-Rich can also be applied at this time, 1 to 2 quarts per acre.
The above application can be repeated during the reproductive growth stage, as needed.

This application can accompany other products being applied at this time.

COMMENTS:

- When applying Sugar Creek Ag products with other products, including herbicides, pesticides & fungicides; a jar test is recommended for compatibility.
- One quart of Liquid Kelp can be added to any application during the growing season.
- REVAMP can be added to any foliar application at 4 to 6 ounces per acre.
- 4 ounces of Nano Pro per acre is suggested when making foliar applications, unless Nano Phos is applied.

Other products to consider for Peanuts include:

Nano K Nano Fe Nano Zn OVERHAUL N2-GROW When applying herbicides, use WILDFIRE

We understand that farming practices will vary from farm to farm, as do growing conditions, crop needs, etc.
Feel free to contact us to discuss the best ways to utilize our products on your farm. Our products should be considered a supplemental “tool” to assist you in meeting your goals and to address soil and crop challenges.
